

AGAIF 2026 BOOTCAMP I: FOUNDATIONAL GEOAI

Hands On Session 6

Online
7 Jul 2026 (Tuesday)

Prof. Sr Ts. Gs. Dr. Khairul Nizam Abdul Maulud

Department of Civil Engineering,
Faculty of Engineering and Built Environment,
Universiti Kebangsaan Malaysia

Making Online map

1. Open Deepseek / Chat GPT or any AI apps
2. Type the questions “ Please write a coding of Leaflet application to locate the coordinate of places in Asean. Please use the attachment document (Place.xlsx) for marking a plotting. Make a label of each locations”
3. Copy script / Save the Leaflet
4. Open Any compiler apps “<https://onecompiler.com/> ” or Run the Leaflet
5. Paste and run

BUILD YOUR OWN ASEAN MAP ONLINE

Locate, Plot and Label Places using **Leaflet**

WHAT YOU NEED

Place.xlsx
List of places & coordinates

Leaflet
Application

Map with
Labels

Share
Online Map

1

OPEN AI TOOL

Open Deepseek / ChatGPT
or any AI apps

2

TYPE YOUR QUESTION

Ask the AI to write Leaflet code
to locate coordinates of places
in ASEAN.
Use the file "Place.xlsx" for
plotting and make a label of
each location.

3

COPY & SAVE

Copy the generated script
and save the Leaflet code
as an HTML file.

4

OPEN IN COMPILER

Open any online compiler
like "https://onecompiler.com/"
or run the Leaflet file locally.

5

PASTE & RUN

Paste the code and run it to
view your interactive ASEAN
map with labeled locations.

FROM QUESTION TO MAP – IN 3 EASY STEPS

STEP 1 Ask AI to generate Leaflet code

Please write a coding of Leaflet application to locate
the coordinate of places in Asean. Please use the
attachment document (Place.xlsx) for marking a
plotting. Make a label of each locations

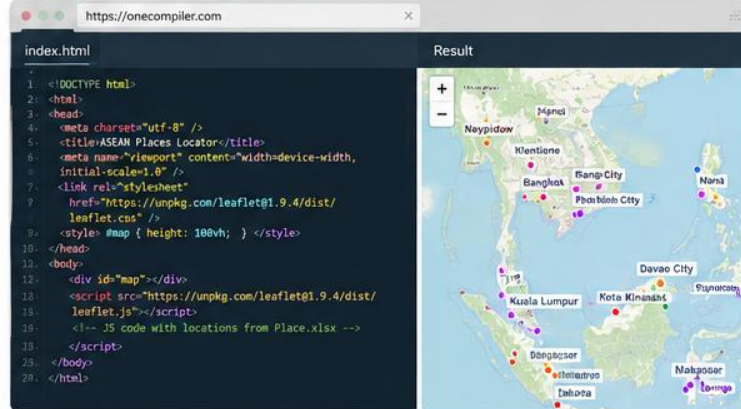

Done. I created the Leaflet application using 230 locations
from Place.xlsx, with markers and labels for each place.

Download file

Download the Leaflet HTML file

asean_places_leaflet.html

STEP 2 Run the generated file in a compiler

STEP 3 View your interactive ASEAN map with labeled locations

TIPS

Ensure Place.xlsx
has columns:
Name, Latitude,
Longitude, Country

You can customize
marker colors,
icons and popup
labels.

Host your HTML file
on GitHub Pages,
Netlify or any web
hosting to share
online.

With QGIS & Leaflet, you can turn data into interactive maps and share insights with the world.
Open Source. Open Possibilities.
